LIFT is a shower tray obtained by milling a block of natural stone which, thanks to CNC technology, is modeled on the basis of CAD drawings which ensure maximum execution precision.

The removable slats rest on a system of parallelepiped elements obtained by extrusion from the bottom of the shower tray, suitably modeled to allow the water to flow towards the drain.

The slats, in laminated wood and/or stone, are also equipped with an anti-slip system obtained by engraving or, alternatively, with raised hemispheres.

Both the stone and the wood are treated with water-based polymers (ecofriendly).

— DATA SHEET

— Since these are handcrafted products, the images of the materials used are indicative, photos of the materials actually selected will be provided at the time of the order.

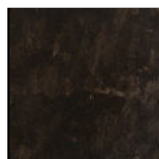

## — FINISHES

- STONES:

Lavica

Pece

Modica

- WOODS:

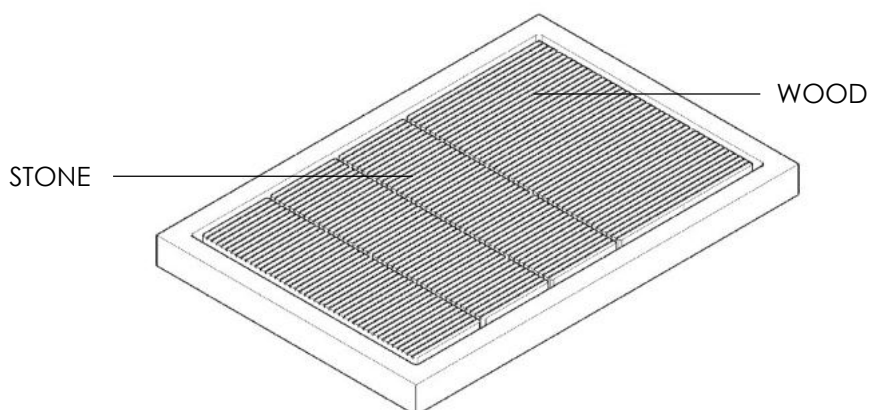

Teak

## — TECHNICAL INFORMATION

- STRUCTURE\_80 mm thick stone with brushed finish and hydro-water-based oil repellent (ecofriendly).
- SLATS\_30 mm thick wood or stone with a matt brushed finish, non-slip milling, water-based protective treatment (ecofriendly).
